**Linear Adjustability**

- Tighten (twist) the off-the-shelf part
- Slider Lock (tension?)

**Joints**

- Straw Joint
- Secure/Stiff joint

- Stainless Steel flex joint with rubber encapsulate to hold position!

- Friction lock, ball joint, cone connections

**Base**

- Only provide one range of motion

- Measurement device with travel in and out of base and touch floor so that height is always known

**Camera**

Is the elevation always matching the floor?
