Hearing Aid Kit
Detailed Design Review Notes

- What about using a microphone instead of a speaker
- Look into making the speaker an intercom
- Find speaker encasement that can be purchased
- Color coding on wires or battleship style
  - Introduce red leads/black leads with or without discussing
- If wired incorrectly, would students fry the amp?
  - Template/overlay or filling in holes that will not be used
  - Give students access only to resistors and speakers
  - **Try to connect everything a student might**
- Can PCB and through-hole board design be combined?
