

# Eye-tracking Software Architecture

**Java App**  
Main processing loop

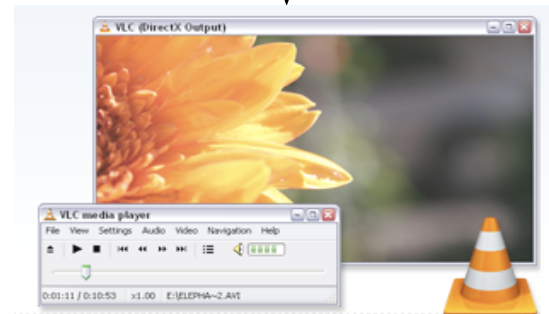

Event-driven  
interrupts will control  
processes of these  
applications

**Biopotentials  
Application**

**Video  
Application**

Collects and plots data and  
make it easily available for  
research purposes using  
lab view

Creates a .ps file that stores  
both video streams time-  
stamped. Can be viewed using  
the same video app or another  
media player (VLC).
