

# Programming Considerations

# Software Design Criteria

1. Ease of use
2. Interface capabilities with other software
3. Implementation difficulty
4. Reliability

-Calibration-

# Desired Software Process

Ideally we would use:

- Image Capture: source code if available, could use macro
- Motor Control: OptiGrid
- Image Processing: ImagePro plugin initially for experimentation but ultimately we would like to use Kodak software, but this relies on the source code being available
