

Space Weather Observatory - Benchmarks

- RIT's METEOR project
 - Different goal for their project, but many similarities.
 - Working near their facilities and equipment.
 - Specific similarities and concepts include
 - Mounting of antenna
 - Cabling from antenna to command center
 - Setup and upkeep of command center
 - Professional dealings with RIT

Space Weather Observatory - Benchmarks

-Other Space Weather Observatories

- Quick research has revealed no project with the exact same intent and scale
- However, there are many projects which are similar enough to be useful to us
- Research into their work and contacting them could prove to be helpful in our process.
 - Airglow and Irregularities Research Group at U. Illinois
 - Haystack Observatory at MIT
 - The Air Force's SEEFS project
