</table>
Design and Construction of a 6-DoF Fabrication Platform
James Grossman, Warren Parad, Hod Lipson, Cornell University -------------- 107

Integrating UC and FDM to Create a Support Materials Deposition System
M.L. Swank\textsuperscript{a}, B.E. Stucker\textsuperscript{a}, F.R. Medina\textsuperscript{b}, R.B. Wicker\textsuperscript{b}, \textsuperscript{a}Utah State University, \textsuperscript{b}University of Texas at El Paso ------------------- 115

Integration & Process Planning for Combined Ultrasonic Consolidation and Direct Write
Ludwing A. Hernandez, Brent Stucker, Utah State University ------------------- 129

Development of a Melt Pool Tracking Vision System for Laser Deposition
Todd Sparks, Lie Tang, Frank Liou, Missouri University of Science and Technology ------------------------------- 148

Characterization of Shrinkage and Stresses in Large Area Maskless Photopolymerization
Kiran Kambly, Dajun Yuan, Peng Shao, Suman Das, Georgia Institute of Technology ------------------------------- 155

Experimental Determination of Optimum Parameters for Stainless Steel 316L Annealed Ultrasonic Consolidation
R. Gonzalez, B. Stucker, Utah State University------------------------------------------------- 166

Investigation on Occurrence of Elevated Edges in Selective Laser Melting
Evren Yasa, Jan Deckers, Tom Craeghs, Mohsen Badrossamay, Jean-Pierre Kruth, Catholic University of Leuven ----------------------------------------------- 180

Effect of Powder Compaction in Plastic Laser Sintering Fabrication
Toshiki Niino, Kazuki Sato, The University of Tokyo ----------------------------------------------- 193

Development of Extrusion-on-Demand for Ceramic Freeze-Form Extrusion Fabrication
Thomas Oakes, Parimal Kulkarni, Robert G. Landers, Ming C. Leu, Missouri University of Science and Technology ----------------------------------------------- 206

Increase of Heat Transfer to Reduce Build Time in Rapid Freeze Prototyping
Ming C. Leu, Sriram P. Isanaka, Von L. Richards, Missouri University of Science and Technology ----------------------------------------------- 219

Investigation of Support Materials for Use in Ultrasonic Consolidation
M.L. Swank, B.E. Stucker, Utah State University ----------------------------------------------- 231

Modeling
Sustainability Study in Selective Laser Sintering – An Energy Perspective
Rameshwar Sreenivasan, David L. Bourell, The University of Texas at Austin ----------------------------------------------- 257
STL 2.0: A Proposal for a Universal Multi-Material Additive Manufacturing File Format
Jonathan D. Hiller, Hod Lipson, Cornell University 266

Design Automation for Multi-Material Printing
Jonathan D. Hiller, Hod Lipson, Cornell University 279

Advanced Process Planning for Subtractive Rapid Prototyping
Joseph E. Petzelka, Matthew C. Frank, Iowa State University 288

Digital Data Processing Strategies for Large Area Maskless Photopolymerization
Anirudh Rudraraju, Suman Das, Georgia Institute of Technology 299

Examination of the Powder Spreading Effect in Electron Beam Melting (EBM)
C. Eschey, S. Lutzmann, M.F. Zaeh, Technische Universitaet Muenchen 308

Effect of Free-Edges on Melt Pool Geometry and Solidification Microstructure in Beam-Based Fabrication of Thin-Wall Structures
Joy E. Davis, Nathan W. Klingbeil, Srinkanth Bontha, Wright State University 320

Materials

Electrochemical Infiltration of Laser Sintered Preforms with Metals
Abhishek Goel, David Bourell, The University of Texas at Austin 332

Comparison of Density of Stainless Steel 316L Parts Produced with Selective Laser Melting Using Different Powder Grades
A.B. Spierings, G. Levy, Inspire AG 342

Further Exploration of Multi-Material Fabrication Capabilities of Ultrasonic Consolidation Technique
J.O. Obielodan, B.E. Stucker, Utah State University 354

Effect of Build Parameters and Build Geometries on Residual Microstructures and Mechanical Properties of Ti-6Al-4V Components Built by Electron Beam Melting (EBM)

The Effects of Specimen Dimensions on the Mechanical Behavior of EBM Produced Ti6Al4V Alloys
R.S. Kircher, A.M. Christensen, K.W. Wurth, Medical Modeling Inc. 398

Effects of Post Processing Heat Treatments on the Bond Quality and Medical Strength of Ti/Al 3003 Dual-Materials Fabricated Using Ultrasonic Consolidation
J.O. Obielodan, B.E. Stucker, Utah State University 406
Electron Beam Melted (EBM) Co-Cr-Mo Alloy for Orthopaedic Implant Applications
R.S. Kircher, A.M. Christensen, K.W. Wurth, Medical Modeling, Inc.------------------------428

Indirect Selective Laser Sintered Fully Ferrous Components-Infiltration Modeling, Manufacturing and Evaluation of Mechanical Properties
Phani Vallabhamoju, David L. Bourell, The University of Texas at Austin-----------------------------------437

Synthesizing of Functionally Graded Surface Composites by Laser Powder Deposition Process for Slurry Erosion Applications
Ehsan Foroozmehr\textsuperscript{a}, Rouzbeh Sarrafi\textsuperscript{b}, Syed Hamid\textsuperscript{b}, Radovan Kovacevic\textsuperscript{c},
\textsuperscript{a}Southern Methodist University, \textsuperscript{b}Halliburton Energy Services --------------------------------446

Functionally Graded Materials by Laser Metl Deposition
Syamala R. Pulugurtha\textsuperscript{a}, Joseph Newkirk\textsuperscript{a}, Frank Liou\textsuperscript{a}, Hsin-Nan Chou\textsuperscript{b},
\textsuperscript{a}Missouri University of Science & Technology, \textsuperscript{b}Boeing Research and Technology -----------------------------------454

Evaluation of Direct Diode Laser Deposited Stainless Steel 316L on 4340 Steel Substrate for Aircraft Landing Gear Application
Tien Fu\textsuperscript{a}, Todd E. Sparks\textsuperscript{a}, Frank Liou\textsuperscript{a}, Joseph Newkirk\textsuperscript{a}, Zhiqiang Fan\textsuperscript{a},
Syamala R. Pulugurtha\textsuperscript{a}, Jianzhong Ruan\textsuperscript{a}, Hsin-Nan Chou\textsuperscript{b}, \textsuperscript{a}Missouri University of Science and Technology, \textsuperscript{b}Boeing Phantom Works --------------------------470

New Material Systems for 3D Ceramic Printing
Grant Marchelli, Mark Ganter, Duane Storti, University of Washington at Seattle -----------------------------------477

Fabricating Superhydrophobic Surfaces with Solid Freeform Fabrication Tools
Alan M. Lyons\textsuperscript{a}, John Mullins\textsuperscript{b}, Mark Barahman\textsuperscript{c}, Itay Erlich\textsuperscript{a}, Todd Salamon\textsuperscript{c}, \textsuperscript{a}CUNY – College of Staten Island, \textsuperscript{b}Bell Laboratories – Alcatel-Lucent Dublin, \textsuperscript{c}Bell Laboratories – Alcatel-Lucent USA --------------------------488

Laser Printed Elastomeric Parts and Their Properties
D.I. Wimpenny, S. Banerjee, J. Jones, De Montfort University -----------------------------------498

New Polymerization-Mixture Formulation for Jetting: An Approach to Production of Polyamide 6 Parts
K. Khodabakhshi, M. Gilbert, P. Dickens, R. Hague, S. Fathi,
Loughborough University -----------------------------------507

Powder Pre-Conditioning for the LS Process
C.E. Majewski, P.M. Horsford, N. Hopkinson, Loughborough University ---------------------------519

Flammability and Thermal Properties of Polyamide 11-Alumina Nanocomposites
S.C. Lao\textsuperscript{a}, J.H. Koo\textsuperscript{a}, T.J. Moon\textsuperscript{a}, B. Hadisujoto\textsuperscript{a}, W. Yong\textsuperscript{a}, L. Pilato\textsuperscript{b}, G. Wissler\textsuperscript{b}, \textsuperscript{a}The University of Texas at Austin, \textsuperscript{b}KAI, Inc.-----------------------------------529
Processing and Properties of Carbon Black-Filled Electrically Conductive Nylon-12 Nanocomposites Produced by Selective Laser Sintering  
S. Athreya, K. Kalaitzidou, S. Das, Georgia Institute of Technology---------------- 538

Photopolymer Solidification for Inclined Laser Exposure Conditions  
Young Hyun Kim\textsuperscript{a}, Jong Seon Lim\textsuperscript{a}, In Hwan Lee\textsuperscript{a}, Ho-Chan Kim\textsuperscript{b},  
\textsuperscript{a}Chungbuk National University, \textsuperscript{b}Andong National University ------------------ 547

Functional Micro/Macro Fabrication Combining Multiple Additive Fabrication Technologies: Design and Development of an Improved Micro-Vane Phacoemulsifier used in Cataract Surgery  
Jae-Won Choi\textsuperscript{a}, Masaki Yamashita\textsuperscript{a}, Jun Sakakibara\textsuperscript{b}, Yuichi Kaji\textsuperscript{b}, Tetsuro Oshika\textsuperscript{b}, Ryan B. Wicker\textsuperscript{a}, \textsuperscript{a}University of Texas at El Paso, \textsuperscript{b}University of Tsukuba-------------------------------- 553

Applications

Fused Deposition Modeling of Polymethylmethacrylate for Use in Patient-Specific Reconstructive Surgery  
David Espalin\textsuperscript{a}, Karina Arcaute\textsuperscript{a}, David Rodriguez\textsuperscript{a}, Frank Medina\textsuperscript{a}, Matthew Posner\textsuperscript{a}, Ryan Wicker\textsuperscript{a}, \textsuperscript{a}University of Texas at El Paso, \textsuperscript{b}William Beaumont Army Medical Center -------------------------------- 569

A Study of Variable Stiffness Alginate Printing for Medical Applications  
Adaleena Mookerjee, Daniel L. Cohen, David H. Peng, Lawrence J. Bonassar, Hod Lipson, Cornell University-------------------------------- 584

Investigation and Design of an Actively Actuated Lower-Leg Prosthetic Socket  
J. Montgomery, M. Vaughan, R. Crawford, The University of Texas at Austin -------------------------------------------------- 595

Topology Optimization and Freeform Fabrication Framework for Developing Prosthetic Feet  
Nicholas P. Fey, Brian J. South, Carolyn C. Seepersad, Richard R. Neptune, The University of Texas at Austin -------------------------------- 607

Wafer-Scale, Solid Freeform Fabrication of Fully-Assembled Metal Micro-Mechanisms for Minimally-Invasive Medical Devices  
A. Cohen, R. Chen, U. Frodis, M. Wu, C. Folk, Microfabrica Inc.----------------------------- 620

Design Optimization of a Customized Dental Implant Manufactured via Electron Beam Melting\textsuperscript{a}  
Gilbert Chahine\textsuperscript{a}, Hosein Atharifar\textsuperscript{b}, Pauline Smith\textsuperscript{c}, Radovan Kovacevic\textsuperscript{c},  
\textsuperscript{a}Southern Methodist University, \textsuperscript{b}Millersville University, \textsuperscript{c}Army Research Laboratory ----------------------------------------------- 631

Effect of Laser Fluence in Laser-Assisted Direct Writing of Human Colon Cell  
Yafu Lin\textsuperscript{a}, Guohui Huang\textsuperscript{a}, Yong Huang\textsuperscript{a}, Jeremy Tzeng\textsuperscript{a}, Douglas Chrisey\textsuperscript{b}, \textsuperscript{a}Clemson University, \textsuperscript{b}Rensselaer Polytechnic Institute ------------------------ 641
Fabrication of Custom Dynamic Pedorthoses for Clubfoot Correction via Additive-Based Technologies
Vito Gervasi\textsuperscript{a}, Douglas Cook\textsuperscript{a}, Robert Rizza\textsuperscript{a}, Sheku Kamara\textsuperscript{a}, Xue Cheng Liu\textsuperscript{b}, \textsuperscript{a}Milwaukee School of Engineering, \textsuperscript{b}Children’s Hospital of Wisconsin & Medical College of Wisconsin

Customized Rapid Manufactured Parts: Technology and Case Studies from the Custom-Fit Project
J. Jones, C.L. Jones, D.I. Wimpenny, De Montfort University

Investigation on Occurrence of Elevated Edges in Selective Laser Melting
Evren Yasa, Jan Deckers, Tom Craeghs, Mohsan Badrossamay, Jean-Pierre Kruth, Catholic University of Leuven

Fuel Cell Development Using Additive Manufacturing Technologies – A Review
N.P. Kulkarni, G. Tandra, F.W. Liou, T.E. Sparks, J. Ruan, Missouri University of Science and Technology

Design, Fabrication of Testing of Graphite Bipolar Plates for Direct Methanol Fuel Cells
Kaushik Alayavalli, David L. Bourell, University of Texas at Austin

Brick Printing: Freeform Fabrication of Modular Architectural Elements with Embedded Systems
Jeffrey I. Lipton, Daniel Cohen, Hod Lipson, Cornell University

Selective Electron Beam Melting: A New Way to Auxetic Cellular Structures
Jan Schwerdtfeger, Peter Heinf, Robert F. Singer, Carolin Körner, University of Erlangen-Nürnberg

Electronics Integration in Conformal Substrates Fabricated with Additive Layered Manufacturing
Sylvia Castillo, Dan Muse, Frank Medina, Eric MacDonald, Ryan Wicker, University of Texas at El Paso

Design of Periodic Cellular Structures for Heat Exchanger Applications
Vikas Kumar\textsuperscript{a}, Guhaprasanna Manogharan\textsuperscript{a}, Denis R. Cormier\textsuperscript{b}, \textsuperscript{a}North Carolina State University, \textsuperscript{b}Rochester Institute of Technology

Advanced Heat Sinks Enabled by Three-Dimensional Printing
Alan Lyons\textsuperscript{ab}, Shankar Krishnan\textsuperscript{ac}, John Mullins\textsuperscript{a}, Marc Hodes\textsuperscript{ad}, Domhnail Hernon\textsuperscript{a}, \textsuperscript{a}Bell Laboratories – Alcatel-Lucent Dublin, \textsuperscript{b}CUNY-College of Staten Island, \textsuperscript{c}Battelle/Pacific Northwest National Laboratory, \textsuperscript{d}Tufts University

Reprinting the Telegraph: Replicating the Vail Register Using Multi-Materials 3D Printing
Matthew Paul Alonso, Evan Malone, Francis C. Moon, Hod Lipson, Cornell University
Design and Manufacture of a Formula SAE Intake System Using Fused Deposition Modeling and Fiber-Reinforced Composite Materials
Ryan Ilardo, Christopher B. Williams, Virginia Polytechnic Institute and State University ............................................................... 770

Multiple Material Microstereolithography
Jae-Won Choi, Eric MacDonald, Ryan Wicker, University of Texas at El Paso ....................................................................................... 781

High Thermal Conductivity Coatings via LENS™ for Thermal Management Applications
Félix A. España, Vamsi Krishna Balla, Susmita Bose, Amit Bandyopadhyay, Washington State University ......................................................... 793

Recent Progress on Scanning Laser Epitaxy: A New Technique for Growing Single Crystal Superalloys
Michael Kirka, Rohan Bansal, Suman Das, Georgia Institute of Technology .................................................................................................. 799

Hydrocolloid Printing: A Novel Platform for Customized Food Production
Daniel L. Cohen, Jeffrey I. Lipton, Meredith Cutler, Deborah Coulter, Anthony Vesco, Hod Lipson, Cornell University ........................................... 807

Customized Layer Deposition for Chemical Reactor Applications
J. Singh\(^a\), C. Hauser\(^a\), P.R. Chalker\(^a\), C.J. Sutcliffe\(^a\), A.T. Clare\(^a\), M. Dunschen\(^b\), \(^a\)University of Liverpool, \(^b\)FreeSteel ......................................................................................... 819

Author/Attendee List ................................................................................................................................. 831
