

Meeting Notes 1/11/2012

Chris Guerra
John Burns
Ryan Hurley
Matt Kasemer
Dr. K

Agenda:

Concept Generation
Pew Charts for both vibes and thermo
Powerpoint for Presentation (with template- Chris)
 Ryan- learn edge (today/Friday) and MS Project
Everything on edge before presentation

Recap of deliverables

Ryan: Logistics for DR worked out, pictures worked out, but I haven't started the MS project timeline

Chris: I did that. I was bored in class.

Chris: I did the house of quality, a project timeline, Gant Charts, and did some thermosyphoning analyses. No calcs, purely back-of-napkin stuff.

John: Uploaded everything to edge, but I still need a screenshot of the Gant Chart. I talked to the other team about their presentation, and I also have another presentation from Bill that was good.

Kasemer: Called Lord MR woman, and she'll have time next week for a long, in-depth discussion. Also looked at some vibrations data.

Dr. K:

Design review for next Wednesday works well for me. 2-4 pm

Also Invite:

Boedo

Bailey

Hanzlik

Dr. K

Dr. Nye

Dr. Hensel

Dr. Lam

Other group

Scott

Have 1st principles model of system for systems level design review. Accel + mass -> force -> load on bolts to floor

Should eventually have a Factor of Safety.

Lots of assumptions, list said assumptions

For Friday:

Scan concept drawings

Look at previous presentations

Begin/Finalize SDR presentation
