

This meeting was mostly to answer questions that the students came up with.

The Pugh analysis is not meant to cycle the datum through each concept, it should be changed to the highest-scoring concept after each analysis. Also after each analysis, small changes/alterations/improvements should be made to the concepts based on the successful traits of other concepts.

The SDR is not necessarily meant to have a decided concept, it just needs to showcase a plan for finding it.

How do we get spending approved?

- +reason to buy it
- +plans to complete if the item works and if it doesn't
- +can it be reused?

We need to know when to can and idea

- +based on time spent, costs, and doubts

Don't surprise your customer in a review

- +so we shot them an email outlining our most basic concepts

What makes a good spec?

- +specific
- +measurable
- +testable
- +concise
