

- Reviewed House of Quality chart.
 - Re-ranked their importance and correlations
 - Edited both Engineering requirements and Customer requirements
 - Changed both of their weight/Importance
 - Thinking of adding Waterproof system to our engineering requirements.
 - After reviewing the Eng. Req'mts, we decided on 2 ranking scales
 - Relative Weight- calculated based on House of Quality
 - What we think is most important (scale of 1/3/9)

Prep for visit to customer site on Tuesday 17th September 2013

- Pictures of the enclosure
- Maybe video of the system so we can bring back to the other group members
- Possible samples
- Pump specifications
 - Pump outlet diameter
- E-stop?
- Do they have an existing procedure?
- Technician info
