

	Less	Expected	Easier/better
Question 1	1	10	14
Question 2	3	15	7
Question 3	0	3	22
Question 4	1	4	20

A survey was given to 25 people at Imagine RIT 2015. The sample was of a wide range of ages (8yrs & up). The survey results are listed here.

	Less Easy Than Expected	As Expected	Easier Than Expected
How easy was it to tell what side the bearings were moving on?	4%	40%	56%
	Less Desirable	As Expected	Better Than Expected
How comfortable is the diameter of the cane handle?	12%	60%	28%
	Not at all	Yes, but barely	Yes
Was the right bearing in a location your hand could reach?	0	12%	88%
	Not at all	Yes, but barely	Yes
Was the left bearing in a location your hand could reach?	4% (8 yr old)	16%	80%

Comments:	Heavy	Sensor too sensitive	Move left bearing	Grips on the top/bottom	Make it feel sturdier
	Needs more handle contours (ergonomic)		Fit handle size to person's hand size(s, m, l)		More compact design
	Create left handed version
