## Readi-Steady Glove

Readi-Steady Anti-Tremor Hand Orthotic

way to help my patients gain control of their hand tremors in all aspects of daily living. Many adaptive devices currently on the market (weighted utensils and modified pens) work wonderfully to counter tremors, but most are task-specific, costly and are far from subtle. with all this in mind, I designed the Readi-Steady Glove to serve as a single tool to reduce both resting and action tremor in a way that is comfortable, low-maintenance and cost-effective.

I am beyond thrilled that the Readi-Steady Glove has already helped so many of patients regain their confidence and enjoy life again!

**-Krista Madere, LOTR -Inventor, Readi-Steady Glove**

The Readi-Steady anti-tremor, custom glove was created for people of all ages suffering with mild to severe hand tremors associated with, but not limited to:

Parkinson's Disease  
Essential Tremor  
Dystonic Tremor  
Resting Tremor  
Action Tremor  
Cerebellar Tremor  
Psychological Disorders

Readi-Steady Helps 9 y/o Breea

Readi Steadi helps Miami man

“I can go out to lunch with my friends or colleagues from work and I don’t have to worry about what might happen when I pick up my water glass or how I’m going to manage the salad course. I know with the glove on I can just enjoy the moment.”

– Tonja Baker –
