### Description

### Customer Reviews

The **Rocker Knife with T-handle** is an easy-to-use adaptive knife that cuts food with a rocking motion. This unique knife provides a mechanical advantage for cutting food to help people with poor hand strength. By applying pressure from directly above the object to be cut, less strength and dexterity are needed by the user to cut food.

The 4 1/2 inch stainless steel single-edge curved blade easily cuts through food and can be sharpened like any other kitchen knife. The knife is easy to use - simply apply gentle pressure to the handle with your whole hand then simply rock back and forth. There is a choice of either a wooden handle or a black plastic handle. A carrying case for safely transporting the rocker knife is also available.

#### Rocker Knife with T-handle Specifications:

- **Dimensions:**4.5 inch long blade with 4.0 inch long t-handle.
- **Made in:**USA.
