

Team: P17046 Engineer: Zachary Maher

Entering Phase: MSD II Phase 1

What do I plan on doing to ensure that Team P17046 has a successful Phase 8 review?

1. Finish building and assembling frame.
2. Test assembly's functionality/ability to catch and kick a ball.
3. Assist with any tasks team members need extra help with.

You will answer these three questions when you submit at the end of Phase: Integrated System Build & Test.

1. Was my team on track?
2. Did we have a working prototype Integrated System to demonstrate?
3. Technical Report 50% completed?
