

Battery Instructions

Charging:

Instructions:

- Connect black & red leads of the black battery pack to the black & red leads of the green power converter box, respectively
 - Connectors have alignment tabs to avoid alignment confusion
- Connect wall plug into other side of green power converter box
- Insert wall plug into wall outlet
 - Wait until battery is charged before disconnecting
 - Device is fully charged when green power converter box green LED light is lit

Notes:

- Green power converter box slider should be set to 1.8A, not 0.9A
- When connected to wall outlet, the green power converter box will flash a red LED twice then go off. After, the red LED will go on to display it is charging.
 - When charging complete, red LED will go out and green LED will light
 - Charging should take roughly 1.5 hours
 - Disconnect promptly

WARNINGS:

- Green power converter box will get VERY hot
 - Place on a heat resistant surface when charging
- Do not charge battery with a voltage less than 9.6V or higher than 18V
 - $9.6V < X < 18V$
- Do not disassemble battery
 - High voltage danger
- Keep battery & green adapter box away from wet surfaces, flammable items, and/or explosives

Battery Instructions

Discharging:

Instructions:

- Connect black & red leads of the black battery pack to the black & red leads of the incubator unit, respectively, located inside the backpack unit
 - Connectors have alignment tabs to avoid alignment confusion
- Turn switch to on position; switch located on incubator unit
 - Wait until battery is discharged before disconnecting

Notes:

- Do not drop battery
- Do not intentionally damage battery
- If damaged, discard and obtain new battery
- If components begin smoking, disconnect battery and remove damaged components

WARNINGS:

- Do not disassemble battery
 - High voltage danger
- Keep battery away from wet surfaces, flammable items, and/or explosives
