

**Multidisciplinary Senior Design  
Subject Matter Expert Feedback Form**

**Students:** Please complete the top of this form and solicit brief input from your faculty Subject Matter Expert (SME). You may return this form to the Design Center Office or leave it with the faculty member to return separately.

Team/Discipline P18031 Faculty SME Dr. Ehsan Rashedi

Discussion Topic Ergonomic Analysis for sliders

**Faculty:** Please complete this brief survey by circling the most appropriate response, and return the form to either the student or the Design Center office. This is **not** used to assign grades but comes directly back to the Design Center and will be used for an overall assessment of how well students come prepared for MSD and how much time faculty and staff outside MSD are spending with teams.

	1	2	3	4	5
How well did the team/student identify high-risk design areas and perform the appropriate feasibility analysis.	Sub-standard work, with significant guidance		Acceptable work, with acceptable level of guidance		Exemplary work, done independently
How appropriate was your skill set to the students' questions?	Not at all		Somewhat		Very
Approximately how much time did you spend with this student or team?	<15 min	15-30 min	30-45 min	45-60 min	>60 min

Other comments:

Good Anthropometric analysis, though more force analysis can be helpful. We had a discussion on optimal location for handle placement, which can benefit the design.
