

Team: P19105 Engineer: Xavier Tarr

Entering Phase: 8 - Customer Handoff and Final Documentation

What do I plan on doing to ensure that Team P19105 has a successful Phase System Design Review?

1. Each team member should 3-5 specific tasks that he or she will complete prior to the next review.

Task 1: Get all our code and sensors finalized before the testing on April 15th.

Task 2: Accurately collect as many samples as possible during the launch.

Task 3: Finalize bringing our systems together with the engine team.

You will answer these three questions when you submit at the end of Phase (8).

1. What did I actually do?

Task 1.

Task 2.

Task 3.

Task 4.

2. What did I learn as an engineer?
